ORDINANCE NO. 1-80

LAKE SHASTINA COMMUNITY SERVICES DISTRICT

SISKIYOU COUNTY, CALIFORNIA

AN ORDINANCE REGULATING THE USE OF PUBLIC AND PRIVATE SEWERS AND DRAINS, THE INSTALLATION AND CONNECTION OF BUILDING SEWERS, THE INSTALLATION OF SEWER LATERALS AND PUBLIC SEWER MAIN EXTENSIONS, PROVIDING FOR EMPLOYMENT OF A MANAGER AND DISTRICT INSPECTOR, PROVIDING PERMITS AND FIXING FEES FOR THE INSTALLATION AND CONNECTION OF SANITARY SEWERS, ESTABLISHING CHARGES FOR ANNEXED AREAS AND SUBDIVISIONS, REGULATING THE DISCHARGE OF WATERS AND WASTES INTO THE PUBLIC SEWER SYSTEM, AND PROVIDING PENALTIES FOR THE VIOLATION OF THE PROVISIONS THEREOF

BE IT ORDAINED by the Board of Directors of the Lake Shastina Community Services District, Siskiyou County, California, as follows:

ARTICLE I

Definitions

Section 101. District shall mean the Lake Shastina Community Services District, Siskiyou County, California.

Section 102. County shall mean the County of Siskiyou, California.

Section 103. Board shall mean the Board of Directors of said District.

Section 104. Manager shall mean the person or persons appointed by the Board to administer and enforce the rules and regulations of District.

Section 105. District Engineer shall mean the Engineer appointed by and acting for the Board and shall be a Registered Civil Engineer.

Section 106. District Inspector shall mean the inspector acting for the Board and may be a member of the Board, the Manager, the District Engineer or Inspector appointed by the Board.

Section 107. Person shall mean any human being, individual, firm, company, partnership, association and private or public and municipal corporations, the United States of America, the State of California, districts and all political subdivisions, governmental agencies and mandatories thereof.

Section 108. Permit shall mean any written authorization required pursuant to this or any other regulation of District for the installation of any sewage works.

Section 109. Building shall mean any structure used for human habitation or a place of business, recreation or other purpose containing sanitary facilities.

Section 110. Applicant shall mean the person making application for a permit for a sewer or plumbing installation and shall be the owner of premises to be served by the sewer for which a permit is requested or his authorized agent.

Section 111. Contractor shall mean an individual, firm, corporation, partnership or association duly licensed by the State of California to perform the type of work to be done under the permit.

Section 112. Single Family Unit shall mean and refers to the place of residence for a single family.

Section 113. Multiple Family Unit shall mean any premises designed, improved or used as a residence for two or more families, living independently of each other in two or more structurally jointed dwelling units with separate entrances, including but not limited to the following: apartment houses and duplexes with separate kitchen facilities but it shall not include hotels, motels, dormitories or similar structures.

Section 114. Commercial Unit shall mean any premises used for commercial or business purposes.

Section 115. Easement shall mean any property that the District has access rights to for the construction, maintenance, or any other operation pertaining to waste water facilities.

Section 116. Wastewater Facilities shall mean all facilities for collecting, pumping, treating and disposing of wastewater or sewage; also referred to as sewage works.

Section 117. Wastewater or Sewage shall mean a combination of water-carried wastes from residences, business buildings, institutions and industrial establishments.

Section 118. Sewer shall mean a pipe or conduit for carrying sewage.

Section 119. Public Sewer shall mean a sewer lying within an Easement and which is controlled by or under the jurisdiction of the District.

Section 120. Combined Sewer shall mean a sewer receiving both surface runoff and sewage.

Section 121. Sanitary Sewer shall mean a sewer which carries sewage and to which storm, surface, and ground waters are not intentionally admitted.

Section 122. Storm Sewer or Storm Drain shall mean a sewer which carries storm and surface or ground waters and drainage, but excludes sewage and polluted industrial wastes.

Section 123. Main Sewer shall mean a public sewer designed to accomodate more than one lateral sewer.

Section 124. Lateral Sewer shall mean the portion of a sewer connecting a building sewer to the main sewer.

Section 125. Building Sewer shall mean that portion of any sewer beginning at the plumbing or drainage outlet of any building or industrial facility and running to the property line.

Section 126. Side Sewer shall mean the sewer line beginning at the foundation wall of any building and terminating at the main sewer and includes the building sewer and lateral sewer together.

Section 127. Private Sewer shall mean a sewer serving an independent sewage disposal system not connected with a public sewer and which accomodates one or more buildings or industries.

Section 128. Outside Sewer shall mean a sanitary sewer beyond the limits of the District not subject to the control or jurisdiction of District.

Section 129. Plumbing System shall mean all plumbing fixtures and traps or soil, waste, special waste and vent pipes, and all sanitary sewer pipes within a building and extending to the building sewer connection two (2) feet outside the building wall.

Section 130. Wastewater Treatment Plant or Sewage Treatment Plant shall mean any arrangement of devices and structures used for treating wastewater (sewage).

Section 131. Garbage shall mean solid wastes from the preparation, cooking and dispensing of food and from the handling, storage and sale of produce.

Section 132. Additional Definitions. For the purpose of this Ordinance, additional terms shall have the meaning indicated in the latest edition of that certain plumbing code entitled, "International Association of Plumbing and Mechanical Officials Uniform Plumbing Code".

adopted by the International Association of Plumbing and Mechanical Officials, a copy of which is on file in the office of the District.

Section 133. Impact Machine shall mean equipment designed for compacting soil by impact and shall include drop hammers, pneumatically operated hammers, hydraulically operated hammers and pneumatic tampers weighing more than thirty-four (34) pounds.

Section 134. Vibrating Machines shall mean equipment designed for compacting soil by mechanical vibration.

Section 135. Heavy Construction Equipment shall mean equipment such as bulldozers, carryalls, trucks, graders and all equipment and vehicles with axle load of five tons or more.

Section 136. Pavement Breakers shall mean drop hammers, pneumatically or hydraulically operated hammers designed for breaking pavement by impact and pneumatic jack hammers weighing more than 80 pounds.

Section 137. Grinder Pump is that disposal device which grinds and propells raw sewage from a building to the low-pressure sewer system.

Section 138. Effluent Pumps are defined as follows:

- (a) Gravity system effluent pump is a system for pumping all effluent from the structure upwards to the gravity sewer system.
- (b) Low-pressure effluent pump is a pump used as an adjunct to an existing septic system to pump liquids into the low-pressure sewer system.

ARTICLE II

General Provisions

Section 201. Rules, Regulations and Specifications. The following rules and regulations in addition to a District Specifications Manual, which manual is hereby incorporated by reference herein together with any amendments thereto, respecting sewer construction and disposal of sewage and drainage of buildings and connection to the sewage works of the District are hereby adopted, and all work in respect thereto shall be performed as herein required and not otherwise.

Section 202. Purpose. This Ordinance is intended to provide rules and regulations for the use and construction of sanitary sewer facilities hereafter installed, altered or repaired within or served by the District. This Ordinance shall not apply retroactively and, in the event of an alteration or repair hereafter made, it shall apply only to the new materials and methods used therein.

Section 203. Short Title. This Ordinance shall be known as the SANITARY SEWER REGULATION ORDINANCE OF LAKE SHASTINA COMMUNITY SERVICES DISTRICT OF SISKIYOU COUNTY.

Section 204. Posting. Upon adoption of this Ordinance, it shall be entered in full in the minutes of the Board, notice of availability for public review at the District Office shall be posted in three public places in the District within ten (10) days of said adoption and shall take effect immediately upon the expiration of thirty (30) days of said adoption.

Section 205. Violation Unlawful. Following the effective date of this Ordinance, it shall be unlawful for any person to connect to, construct, install or provide, maintain and use any other means of sewage disposal from any building in said District except by connection to a public sewer in the manner as in this Ordinance provided.
EXCEPTIONS; Units 7-1, 7-2, 7-3, 8-1, 8-2 and lots designated as septic tank lots in Unit 9-1 and those lots in Units 1, 2, 3, and 4 presently having properly functioning septic tanks. Upon failure of septic tanks and/or leach fields in Units 1, 2, 3 and 4, these lots will be required to connect to the public sewer system.

Section 206. Relief on Application. When any person by reason of special circumstances, is of the opinion that any provision of this Ordinance is unjust or inequitable as applied to his premises, he may make written application to the Board, stating the special circumstances, citing the provision complained of, and requesting suspension or modification of that provision as applied to his premises.

If such application be approved, the Board may, by resolution, suspend or modify the provision complained of, as applied to such premises, to be effective as of the date of the application and continuing during the period of the special circumstances.

Section 207. Relief on Own Motion. The Board may, on its own motion, find that by reason of special circumstances any provision of this regulation and Ordinance should be suspended or modified as applied to a particular premises and may, by resolution, order such suspension or modification for such premises during the period of such special circumstances, or any part thereof.

Section 208. District Inspector, Compensation. The Board of Directors shall employ some fit and qualified person or persons to perform the duties of inspecting the installation, connection, maintenance and use of all side sewers, public sewers, private sewers and facilities in connection therewith in said District, to be known as the District Inspector. The person so employed shall receive as compensation for his services for making inspections required to be made by the ordinances, and orders and regulations from time to time enacted and ordered by the Board, a sum to be fixed by the Board. He shall serve during the pleasure of the Board and may be another official of the District.

Section 209. Permits and Fees. No public sewer, side sewer, building sewer or other sewerage facility shall be installed, altered or repaired, nor shall any plumbing system be installed, altered or repaired which will cause additional fixture units to be added to any existing connection, within the District, until such time as a permit for the work has been obtained from the District and all fees paid in accordance with the requirements of Article VIII of this Ordinance.

Section 210. Pump Installation.

(a) GENERAL. Pump installations shall be required either to propel wastewater from a building to the low pressure sewer system or lifting said wastewater upwards to the gravity sewer system. The installation shall include, but not be limited to, the following: sump or septic tank for collection of wastewater from the building sewer, grinder/effluent/lift pump, check valve, stop valve, disconnect coupling, start/stop mechanism high water audio and visual alarm, electrical junction box and necessary controls insulated and weather proofed.

Pump installation shall be at the sole cost and expense of the applicant, owner or agent.

Upon connection to the public sewer system, the District becomes responsible and shall by Resolution establish operational and maintenance procedures.

(b) SUMP OR SEPTIC TANK. A sump is a tank which receives wastewater located below the normal grade of the main gravity or gradient of the low pressure system and which must be emptied by a pump, lift or grinder respectively, whereas a septic tank is a watertight receptacle which receives wastewater and is designed and constructed so as to separate solids from the liquid, digest organic matter through a period of detention and allows the liquids to discharge into an associated sump from which an effluent pump moves the liquid to the low pressure sewer system. Said sump shall be located within side lot easement unless otherwise authorized by the District in accordance with procedures authorized by Section 206 (Relief on Application). The septic tank shall be located adjacent to the sump and accessible to pumping services via side lot easement or other authorized easement. Final authorization for use of a septic tank rests with the District Manager after considering recommendations of the District Engineer. Note: Slope of terrain and/or position of dwelling may preclude the use of a septic tank due to inaccessibility.

The sump shall be covered with a lid which prevents entry of foreign matter into it while, at the same time providing access to the installed pump for service and replacement when required. Said lid shall be physically attached to the sump.

The entire sump installation shall be covered by a removable, insulated, weather proofed covering which is supported by one or two courses of cinder block or equivalent concrete wall completely surrounding the sump and providing clearance above the highest extension of the sump which is normally the vent or the stop valve located in the discharge line. Said wall surrounding the sump shall contain at the lowest grade level a 1½" drain or larger extending through the wall to allow drainage in the event of sump overflow. On lake front properties or any property so situated that drainage of sump overflow could feasibly reach the waters of Lake Shastina, there shall be constructed a catch basin of a size equal to the capacity of the sump and so located that it is readily visible to occupant of dwelling when entering or leaving dwelling from front or rear entrance to said dwelling. Said drainage shall be so situated that drainage on to a neighboring property is precluded.

(c) WASTEWATER PUMPS: (1) Grinder. Grinder pumps are required for sumps which receive raw sewage and must discharge same into the low pressure sewer system. Said pump shall be a minimum of 1½ HP and of sufficient head capacity to function against the back pressure of other installed pumps connected to the same low pressure sewer system line extension.

(2) Effluent. Effluent pumps are authorized for use in conjunction with a sump which receives wastewater from a septic tank which has the capability of separating solids from the wastewater. This pump, like the grinder, is used to discharge wastewater into the low pressure sewer system and therefore must work against the backpressure of other effluent and/or grinder pumps. Said effluent pumps shall be a minimum of 1 HP with head capability to function on the same low pressure sewer system $1\frac{1}{2}$ or 2 HP units are discharging into. The recommended size can be obtained from the District Office after a review of proposed installation and location with respect to all other units installed on the same low pressure sewer line extension.

(3) Lift. A sewage lift pump is used to propel raw sewage from a sump located below the level of the gravity sewer main up to said sewer main. The actual size (HP) and capacity (GPM) required shall be determined by the specific criteria of each installation.

All of the above pumps shall be connected to discharge line with a disconnect coupling. Said coupling shall be galvanized unions for grinder and effluent pumps whereas coupline for lift pump shall be calder type or equivalent. Said discharge line for grinder and effluent pumps shall be $1\frac{1}{4}$ " schedule 40 PVC whereas discharge line for sewage lift pump shall be 3" ABS unless otherwise authorized by District Office.

Pumps shall be located in side lot easements unless otherwise authorized by the District. This must be resolved prior to any excavation to preclude additional expense to owner or his agent.

For grinder and effluent pumps not mounted or attached to the lid, the plumbing inside the sump shall be galvanized steel to facilitate removal of pump unit for inspection or service. For lift pumps, plumbing shall be 3" ABS unless otherwise authorized by District Office.

(d) CHECK VALVE: For grinder and effluent pumps, the check valve shall be a ball check valve with "bulge" situated above the axis of flow with the following specifications: $1\frac{1}{4}$ " inlet and outlet; cast iron casing; formophenolic resin ball or equivalent; rubber seal and cast iron flanged connection.

For lift pumps, an approved disc type check valve is authorized. Said check valve shall be constructed so that a mechanical seal against backflow will be provided. When fully opened, it shall have a capacity not less than that of the pipe in which it is installed. The valve shall be installed so that its working parts will be accessible for service and repairs and shall be located adjacent to the sump and between pump discharge and stop (shut off) valve. Said check valve shall have all bearing parts of corrosion resistant material with access by means of a bolted cover with gasket.

(e) STOP VALVE: Pump installations shall be provided with an approved American made stop valve located in discharge line between disconnect coupline and main sewer line. Said stop valve shall, when fully opened, have the same diameter as the discharge line in which it is installed. The valve shall be readily accessible and capable of isolating the sump from the main sewer line (which may be pressurized) so that check valve and/or pump installation can be serviced.

(f) START/STOP MECHANISM: Each pump shall be provided with one or more of the following approved switching mechanisms: mercury control switch, diaphragm switch or float rod actuated switch. Said switching mechanism shall be installed in accordance with the latest, effective edition of the National Electric Code.

(g) HIGH WATER ALARM: Each sump installation shall be equipped with an approved high water alarm consisting of an audio horn or bell and a visual, jewel light so located that said alarm can be heard or seen by occupant of dwelling.

(h) ELECTRICAL: (1) Control Panel. The electrical control panel shall be located on the side of the dwelling facing the pump unit. Said control panel shall meet the specifications of the installed pump and meet the electrical and exterior housing standards established by the National Electrical Code. The panel shall contain auto and manual switching capability for operation of pump unit.

(2) Junction Box. With the control panel located on dwelling and sump installation located in side lot easement, the distance between dwelling and sump housing may require use of an electrical junction box. If so, said junction box shall be installed on or near exterior wall of sump housing and shall comply with National Electrical Code for exterior use.

NOTE: JUNCTION BOX SHALL NOT BE INSTALLED WITHIN SUMP HOUSING. THIS IS TO PRECLUDE POTENTIAL ELECTRICAL SHOCK TO MAINTENANCE PERSONNEL WHEN SUMP FAILS AND MUST BE SERVICED!

(i) ELECTRICAL LEADS: Electrical leads for pumps, switching mechanism and alarm systems shall be of sufficient length to allow removal of pump and/or other electrical components for inspection without disconnection from junction box or control panel.

Section 211. Cleanouts.

(a) PROHIBITED CONNECTIONS: Cleanout openings shall not be used for the installation of new fixtures except where approved in writing by the District Office and where another cleanout of equal access and capacity is provided.

(b) LOCATION: Cleanouts shall be located at or near the junction of the plumbing system and the building sewer and at the property line and be not more than 75 feet apart in horizontal drainage system of 3" nominal diameter and not more than 100 feet apart for larger pipes.

(c) ACCESS: Cleanouts shall be extended vertically to or above the finished level and cleanout plugs shall not be covered with concrete, fill or any other permanent finishing material. Where it is necessary to conceal or protect a cleanout plug, an enclosed box with removable cover may be used and shall be accessible for inspection and use.

(d) CLEARANCES: Cleanouts on 3 inch or larger pipes shall be so installed that there is a clearance of not less than 18 inches in front of the cleanout for the purpose of rodding.

(e) SIZE: Cleanouts shall be of the same nominal size as the pipes up to 4 inches and not less than 4 inches nominal for larger piping.

(f) DIRECTION OF FLOW: Every cleanout shall be installed so that the cleanout opens opposite to the direction of the flow of the drainage system.

(g) CHANGE OF DIRECTION: Cleanouts shall be installed at each change of direction of the drainage system 45° or greater except not more than one shall be required in every 40 feet of run unless required by (b) above.

ARTICLE III

Use of Public Sewers Required

Section 301. Disposal of Wastes. It shall be unlawful for any person to place, deposit, or permit to be deposited in an unsanitary manner upon public or private property within the District, or in any area under the jurisdiction of said District, any human or animal excrement, garbage, or other objectionable waste.

Section 302. Treatment of Wastes Required. It shall be unlawful to discharge to any stream or watercourse any domestic or industrial wastes.

Section 303. Unlawful Disposal. Except as set forth in Article II, Section 205, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, seepage pit or other facility intended or used for the disposal of sewage.

Section 304. Occupancy Prohibited. No building, industrial facility or other structure connected to the District's facilities shall be occupied until the owner of the premises has complied with all rules and regulations of District.

Section 305. Sewer Required. The owner of any residential building situated within the District and abutting on any street in which there is now located or may in the future be located a public sewer of the District, is hereby required at his expense to connect said building directly with the proper public sewer in accordance with the provisions of this Ordinance, provided that said public sewer is within two hundred (200) feet of the nearest corner or point on the property line of the parcel or tract of land upon which the building is located except as set forth in Section 205, Article II.

Commercial, industrial and public buildings or institutions shall be required to connect to the District sewer system upon notice as herein provided.

ARTICLE IV

Siskiyou County Health Department has full responsibility for and control of private sewage disposal within the County including the Lake Shastina Subdivision; therefore, this Article shall be ineffective until such time as the District becomes responsible for private sewage disposal.

ARTICLE IV

Private Sewage Disposal

Section 401. Sewer Not Available. Where a public sewer is not available under the provisions of Section 305, the building sewer shall be connected to a private sewage disposal system, complying with the provisions of this Ordinance.

Section 402. Permit Required. Before commencement of construction of a private sewage disposal system the owner shall first apply to the Board for a permit. The application for such permit shall be made on a form furnished by the District, which the applicant shall supplement by any plans, specifications and other information as are deemed necessary by the Board and/or the District Engineer. A permit and inspection fee shall be paid to the District, at the time application is filed, in accordance with the provisions of Article VIII of this Ordinance. The Manager shall be authorized to issue such permit only after the Board has determined that all of the applicable design requirements and criteria have been met.

Section 403. Inspection Required. A permit for a private sewage disposal system shall not become effective until the installation is completed to the satisfaction of the District Inspector. He shall be allowed to inspect the work at any stage of construction and, in any event, the applicant for the permit shall notify the District Inspector when the work is ready for final inspection, and before any underground portions are covered. The inspection shall be made within forty-eight (48) hours, Sundays and holidays excluded, of the receipt of the notice by the District Inspector.

Section 404. Design Requirements. The type, capacities, locations and layout of a private sewage disposal system shall comply with all requirements of the Department of Public Health of the State of California, the Department of Public Health of the County of Siskiyou and other regulatory agencies having jurisdiction thereover. No permit shall be issued for any private sewage disposal system not meeting County requirements. No septic tank or cesspool shall be permitted to discharge to any public sewer or any stream or watercourse or to become unsanitary. *Amendment 9/15/80*

Section 405. Abandonment of Facilities. At such time as a public sewer becomes available to a property served by a private sewage disposal system, as provided in Section 305, a direct connection shall be made to the public sewer in compliance with the ordinances, rules and regulations of District, and any septic tanks, cesspools, and similar private sewage disposal facilities shall be abandoned and filled with suitable material as determined by the District Inspector.

Section 406. Cost of Maintenance by Owner. The owner shall operate and maintain the private sewage disposal facilities in a sanitary manner at all times, at no expense to the District.

Section 407. Additional Requirements. No statement contained in this Article shall be construed to interfere with any additional requirements that may be imposed by any law, ordinance, rule or regulation or by the Health Officer of the County.

ARTICLE V

Building Sewers, Lateral Sewers and Connections

Section 501. Permit Required. In accordance with Article VIII of this Ordinance no person shall construct a building sewer, lateral sewer, make alterations to any plumbing system which will cause additional fixture units to be added to any existing connection, or make a connection with any public sewer without first obtaining a written permit from the District and paying all fees and connection charges as required therein.

Section 502. Construction Requirements. Construction of building sewers and lateral sewers shall be in accordance with the requirements and specifications of the District. The District shall notify the Lake Shastina Mutual Water Company whenever the District or any other agency approved by the District is excavating in the close proximity of the potable water system. This requirement pertains to repairs and/or alterations to the existing sewer systems as well as new construction.

Section 503. Minimum Size and Slope. The minimum size of a building sewer shall be three inches (3") in diameter. The minimum slope of a building sewer shall be one quarter inch (1/4) per running foot for three inch (3") building sewer and one-eighth (1/8) inch for any building sewer in four inch (4") diameter or greater.

Section 504. Separate Side Sewers. Each separate building shall be connected to the main sewer with a separate side sewer, except that one or more buildings located on property owned by the same person may be served by the same side sewer if the District Engineer determines that it is unlikely that the ownership of said property can or will be divided in the future. However, if for any reason, the ownership of said property is subsequently divided, each building under separate ownership shall be provided with a separate side sewer, and it shall be unlawful for the owner thereof to continue to use or maintain such common side sewer. Condominium conversions will be considered on an individual basis for conformance to this section.

Notwithstanding the provisions hereof, single family residential units with common walls, condominium, stock cooperative, community apartment or other similar improvement which entitles owners of interests therein to occupy independent ownership interests and to make joint use of utility and other services, which may be provided by facilities owned in common, may, upon issuance of a permit authorizing such common use by the District Engineer, be permitted to maintain a common side sewer or sewers.

Section 505. Old Building Sewers. Old building sewers may be used in connection with new buildings only when they are found, upon examination and test by the District Inspector, to meet all requirements of District. Whenever older installations require major repairs or replacement of major components, e.g., plumbing, wastewater pump or electrical controls, said installation shall be brought up to District standards including, but not limited to, proper alarm system and access housing. Any relief from this requirement shall be submitted in accordance with Section 206.

Section 506. Cleanouts. Cleanouts in building sewers shall be provided in accordance with the rules, regulations and specifications of the District. All cleanouts shall be maintained watertight and be capable at all times of passing a smoke bomb test, as applied by the District.

Section 507. Sewer Too Low. In all buildings in which any building sewer is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building sewer shall be lifted by artificial means, approved by the Manager and discharged to the public sewer at the expense of the owner.

Section 508. Connection to Public Sewer. The connection of the building sewer into the public sewer shall be made at the lateral or wye, if such lateral or wye is available at a suitable location. Where a lateral or wye has not been installed at the point of desired connection, either a standard wye or tee fitting shall be cut into the main sewer using approved couplings and fittings of the same material as the main sewer, or a saddle connection shall be made in conformance with District specifications. The connection to the public sewer shall be made only by qualified District personnel. Any damage to the public sewer caused by the applicant or their agent shall be repaired at the cost of the applicant.

Section 509. Protection of Excavation. All excavations for a side sewer installation shall be adequately guarded with barricades or lights so as to protect the public from hazard. Streets, sidewalks, parkways and other property disturbed in the course of the work shall be restored in a manner satisfactory to the District and the County or any other person having jurisdiction thereover.

Section 510. Maintenance of Side Sewer. Side sewers shall be maintained by the owner of the property served thereby. Where a side sewer provides service to more than one single family residential unit in a development with common walls, condominium, stock cooperative, community apartment or other similar improvements, the obligation to maintain the side sewer shall be in the homeowners' association or other entity responsible for the maintenance of the property and facilities owned in common.

Section 511. Inspections. In order to preclude any potential contamination of the potable water systems all building and lateral sewers upon completion of construction or modification shall be inspected by the District. As a minimum, the following procedures shall be followed:

- (a) The installation of all new pumps, or replacement of pumps, shall be inspected by the District for conformance to standards delineated in the Specifications Manual prior to connection to the sewer main.
- (b) Whenever any repairs are made to a pump installation where alterations to the plumbing is involved, the District shall be notified so that an inspection can be made to assure that said alterations are in accordance with District standards.
- (c) The District shall conduct periodic inspections of privately owned pumping installations to ensure no changes have been made which are contrary to District standards. Any unapproved or improper plumbing shall be corrected at the expense of the owner or his agent.
- (d) The District shall notify the Lake Shastina Mutual Water Company of all new connections to the public sewer system and of any plumbing alterations to existing building sewers.

ARTICLE VI

Public Sewer Construction

Section 601. Permit Required. In accordance with Article VIII of this Ordinance, no person shall construct, extend or connect to any public sewer without first obtaining a written permit from the District and paying all fees and connection charges and furnishing bonds as required therein. The provision of this Section requiring permits shall not be construed to apply to contractors constructing sewers and appurtenances under contracts awarded and entered into by the District.

Section 602. Plans, Profiles, and Specifications Required. The application for a permit for public sewer construction shall be accompanied by complete plans, profiles and specifications, complying with all applicable ordinances, rules and regulations of District, prepared by a Registered Civil Engineer showing all details of the proposed work based on an accurate survey of the ground. The application, together with the plans, profiles and specifications shall be examined by the District Engineer who shall within ten (10) days approve them as filed or require them to be modified as he deems necessary for proper installation. After examination by the District Engineer, the application, plans, profiles and specifications shall be submitted to the Board at its next regular meeting for its consideration. When the Board is satisfied that the proposed work is proper and the plans, profiles and specifications are sufficient and correct, it shall order the issuance of a permit predicated upon the payment of all connection charges, fees and furnishing bonds as required by the District. The permit shall prescribe such terms and conditions as the Board finds necessary in the public interest.

Section 603. Subdivisions. The requirements of Sections 601, 602 and 611 of this Ordinance shall be fully complied with before any final subdivision map shall be approved by the Board. The final subdivision map shall provide for the dedication for public use of streets, easements or rights of way in which public sewer lines are to be constructed. If a final subdivision map of a tract is recorded and the work of constructing sewers to serve the tract is not completed within the time limit allowed in the permit, the Board may extend the time limit or may complete the work and take appropriate steps to enforce the provisions of the bond furnished by the subdivider.

Section 604. Easements or Rights of Way. In the event that an easement is required for the extension of the public sewer or the making of connections, the applicant shall procure and have accepted by the Board a proper easement or grant of right of way sufficient in law to allow the laying and maintenance of such extension or connection.

Section 605. Persons Authorized to Perform Work. Only properly licensed contractors or District personnel shall be authorized to perform the work of public sewer construction within the District. All terms and conditions of the permit issued by the District to the applicant shall be binding on the contractor. The requirements of this Section shall apply to side sewers installed concurrently with public sewer construction.

Section 606. Grade Stakes. Grade and line stakes shall be set by a Registered Civil Engineer and/or licensed land surveyor prior to the start of work on any public sewer construction. The Contractor shall be responsible for accurately transferring grades to grade bars and sewer invert.

Section 607. Compliance with Regulations. Any person constructing a sewer within a street shall comply with all state or county laws, ordinances, rules and regulations and the Property Owners' Associations' Rules & Regulations pertaining to the cutting of pavement, opening, barricading, listing and protection of trenches, backfilling and repaving thereof and shall obtain all permits and pay all fees required by the department having jurisdiction prior to the issuance of a permit by the District. Any person requesting a permit shall also comply with all applicable guidelines, including the Local Guidelines of District, adopted pursuant to the Environmental Quality Act of 1970, and shall make all deposits required and pay all fees which may be established by the District to process applications to comply with said Act.

Section 608. Protection of Excavation. The applicant shall maintain such barriers, lights and signs as are necessary to give warning to the public at all times that a sewer is under construction and of each dangerous condition to be encountered as a result thereof. He shall also likewise protect the public in the use of the sidewalk, if any, against any such conditions in connection with the construction of the sewer. Street, sidewalks, parkways and other property disturbed in the course of the work shall be re-installed in a manner satisfactory to the District and the County or any other person having jurisdiction thereover.

Section 609. Design and Construction Standards. Minimum standards for the design and construction of sewers with the District shall be in accordance with the Specifications for Sewer Construction heretofore or hereafter adopted by the District, which specifications shall be incorporated in the District Specifications Manual kept on file in the District Office.

Prior to backfilling or covering any work, inspection shall be made to insure conformance with "as built" drawings.

"As-built" drawings showing the actual location of all mains, structures, wyes and laterals shall be filed with the District before final acceptance of the work.

Section 610. Completion of Sewer Required. Before any acceptance of any sewer line by the District and prior to the admission of any sewage into the system, the sewer line shall be tested and shall be complete in full compliance with all requirements of the SPECIFICATIONS FOR SEWER CONSTRUCTION and to the satisfaction of the District Engineer.

Section 611. Improvement Security. Prior to issuance of a permit for public sewer construction, the applicant shall furnish a bond satisfactory to the District to ensure that construction is in accordance with District standards.

Section 612. Financing - General. The extension of the public waste water facilities to serve any parcel or tract of land shall be done by and at the expense of the owner, although the District reserves the right to perform the work and bill the owner for the cost thereof, to perform the work itself, or to perform the work pursuant to special assessment proceedings. The size of all sewer mains and other sewerage facilities shall be as required by the District. Note: Except when work is performed by the District, the applicant shall furnish a bond satisfactory to the District to ensure that extension is in accordance with District standards.

Section 613. District Participation. The District may, in its sole discretion, pay that portion of the costs of the construction of waste water facilities equal to the difference in cost between the size of facility required by installer's development and the size of facility that the District requires under its long-range master plan when all of the following conditions are present:

- (a) The facility to be constructed replaces presently inadequate facility;
- (b) The facility to be constructed is part of a currently planned capital improvement program of the District; and
- (c) The District Board has determined that it is within the District's financial ability to finance its share of the improvement.

Section 614. Soil Compaction Equipment. The use of impact machines or vibrating machines for compacting backfill over sewer lines under construction within the District is hereby prohibited except by permission of the District.

Section 615. Use Limitations. No impact compacting machine or pavement breaker shall be operated within ten (10) feet of any sewer under construction or any sewer connected to the District system without permission of the District.

Section 616. Heavy Construction Equipment. No person shall operate heavy construction equipment over or across a sewer under construction or any sewer connected to the District system, except where the sewer is in a fully paved street, without first obtaining a written permit from the District and paying all costs relating to issuance of the permit and inspection incurred by the District. The person obtaining such a permit shall take all measures as may be required under the permit to fully protect the sewer lines from damage. Where the operation of heavy construction equipment across a sewer line cannot reasonably be avoided, the location of the crossing shall be designated by the District Engineer so as to limit the area of possible damage to the sewer.

Section 617. Pavement Breakers. The use of pavement breakers as defined in Section 136 for breaking pavement over sewer lines connected to the District system is hereby prohibited without permission of the District.

Section 618. Responsibility. Wherever any impact compacting machines, heavy construction equipment or pavement breakers have been operated within ten (10) feet of any sewer line under construction or any sewer connected to the District system, the District may require the persons responsible for operation of such equipment to prove to the satisfaction of the District that no damage has resulted or the extent of the damage if it has occurred. All costs of tests of sewer lines as may be required by the District Engineer shall be borne by the persons responsible for operating the equipment.

Section 619. Repairs of Damaged Sewers. Where in the judgment of the District Engineer damage has resulted from the use of such impact compacting machinery, heavy construction equipment or pavement breakers, repairs shall be promptly made by the person causing the damage at the direction of the District Engineer. The cost of repairs shall be borne by the persons causing the damage.

The District may, at its option, perform the work of repairing any damaged sewer with its own forces or by separate contract and charge the full cost of such work to the persons determined by the District Engineer as being responsible for the damage.

ARTICLE VII

Use of Public Sewers

Section 701. Use of Sewers. In addition to all of the provisions of this Ordinance and any other ordinance, rule or regulation of the District, the use of public sewers for the discharge of water and waste into the public sewer system of District, including domestic and industrial sewage, shall be subject to all of the provisions of that certain Ordinance of District known as the INDUSTRIAL WASTE ORDINANCE OF THE LAKE SHASTINA COMMUNITY SERVICES DISTRICT, SISKIYOU COUNTY, CALIFORNIA, and entitled, "Ordinance No. 2-80, An Ordinance Regulating the Discharge of Sewage and Industrial Wastes into the Public Sewer System, Regulating the Use of Public Sewers, and Providing Penalties for the Violation of the Provisions Thereof" adopted by the Board of Directors of District on February 1, 1980, as now in effect or hereafter amended.

ARTICLE VIII

Permits and Fees

Section 801. Permit Required. No unauthorized person shall uncover, make any connection with or opening into, use, alter, or disturb any public sewer or appurtenances, or perform any work on any lateral or building sewer, or install, alter or repair any plumbing system which will cause additional fixture units to be added to an existing connection without first obtaining a written permit from the District.

Section 802. Application for Permit and Payment of Charges. Any person legally entitled to apply for and receive a permit shall make such application on forms provided by the District for that purpose. He shall give a description of the character of the work proposed to be done and the location, ownership, occupancy and use of the premises in connection therewith. The Manager may require plans, specifications or drawings and such other information as he may deem necessary.

In the event the applicant for a permit is required to provide plans, specifications or drawings and information as a condition to the issuance of the permit, the applicant shall pay all engineering, legal, administrative and other expenses and charges prior to the issuance of the permit. ✓

If the Manager determines that the plans, specifications, drawings and other information furnished by the applicant are satisfactory and are in compliance with the ordinances, rules and regulations of the District, he shall issue the permit applied for upon payment of the charges herein referred to and of the fees as hereinafter fixed.

Section 803. Compliance with Permit. After approval of the application, evidenced by the issuance of a permit, no change shall be made in the location of the sewer, the grade, materials, or other details from those described in the permit or as shown on the plans and specifications for which the permit was issued except with written permission from the District, the Manager or other authorized representatives. ✓

Section 804. Agreement. The Applicant's signature on an application for any permit shall constitute an agreement to comply with all of the provisions, terms and requirements of this and other ordinances, rules and regulations of the District, and with the plans and specifications he has filed with his application, if any, together with such corrections or modifications as may be made or permitted by the District, if any. Such agreement shall be binding upon the applicant and may be altered only by the District upon the written request for the alteration from the Applicant. ✓

Section 805. Fees - Annexation Charges. The Owner or Owners of lands within areas proposed to be annexed to the District shall deposit with the District a sum to be fixed by the Board, prior to the commencement of proceedings by the Board on the proposed annexation. The amount to be fixed by the Board shall be in a sum estimated to equal the engineering, legal and publication costs and all other charges which may be incurred by the District in preparing and examining maps, legal descriptions, and other documents in relation thereto, and other expenses regularly incurred in connection therewith.

Section 806. Fees - Connection Charge. Annexed Areas.

Reserved for future use.

Section 808. Fees - Permit and Inspection Charges.

- (a) Single Family Residence. A fee of Twenty-five Dollars (\$25.00) shall be paid to the District for issuing a permit and inspecting each single family residential building installation.
- (b) Multiple Dwellings, Commercial, Industrial, Public and Other Users. A fee of Twenty-five Dollars (\$25.00) shall be paid to the District for issuing a permit and inspecting each sewer lateral installation serving a multiple dwelling, commercial building, industrial building, school, public building or other facility.
- (c) Alteration of Existing Sewer Installation. A fee of Fifteen Dollars (\$15.00) shall be paid to the District for issuing a permit and inspecting any work adding to, altering, or extending an existing building sewer or plumbing system installation.
- (d) Public Sewer Construction. A fee in an amount to be determined by the District Board shall be paid to the District for reviewing plans and specifications, issuing a permit and inspecting the construction of public sewer mains and laterals. In the case of subdivisions, this fee shall be due and payable prior to approval of the final improvement plans for the subdivision by the District Board.

Section 809. Fees and Deposits - Environmental Quality Act.

Where District is the lead agency or a responsible agency for any project under the state and local guidelines adopted pursuant to the Environmental Quality Act of 1970, the person or persons beneficially interested shall deposit with District the estimated cost of District preparation of materials, reports and the making of evaluations of the proposed project as estimated by the District Engineer. Should the amount of deposit be inadequate to meet the District's costs as lead agency or as a responsible agency involved in providing consultation to the lead agency, as required by law, District shall, prior to completion of the District's evaluation of the proposed project, notify the person or persons beneficially interested of the amount necessary to complete the review of the proposed project which shall be immediately deposited with District. Should there be a surplus remaining in the deposit following completion of the District's evaluation of the project, the surplus shall be returned to the person or persons making such deposit.

Section 810. Disposition of Fees. All fees collected on behalf of the District shall be deposited with the proper authority provided by the District to receive such funds.

Section 811. All Work to be Inspected. All sewer construction work, building sewers, plumbing and drainage systems shall be inspected by an Inspector acting for the District to insure compliance with all requirements of the District. No sewer shall be covered at any point until it has been inspected including compliance with Section 609 Article VI hereof, and passed for acceptance. No sewer shall be connected to the District's public sewer until the work covered by the permit has been completed, inspected and approved by the District Inspector. If the test proves satisfactory and the sewer has been cleaned of all debris accumulated from construction operations, the Inspector shall issue a certificate of satisfactory completion.

Section 812. Notification. It shall be the duty of the person doing the work authorized by permit to notify the office of the District orally or in writing that said work is ready for inspection. Such notification shall be given not less than seventy-two (72) hours before the work is to be inspected. It shall be the duty of the person doing the work to make sure that the work will stand the tests required by the District before giving the above notification.

Section 813. Condemned Work. When any work has been inspected and the work condemned and no certification of satisfactory completion given, a written notice to that effect shall be given instructing the Owner of the premises, or the agent of such Owner, to repair the sewer or other work authorized by the permit in accordance with the ordinances, rules and regulations of the District.

Section 814. All Costs Paid by Owner. All costs and expenses incident to the installation and connection of any sewer or other work for which a permit has been issued shall be borne by the Owner. The Owner shall indemnify the District from liability for any loss or damage to any person that may directly or indirectly be occasioned by the work.

Section 815. Outside Sewers. Permission shall not be granted to connect any lot or parcel of land outside the District to any public sewer in or under the jurisdiction of the District unless a permit herefor is obtained. The applicant shall first enter into a contract in writing whereby he shall bind himself, his heirs, successors and assigns to above by all ordinances, rules and regulations in regard to the manner in which such sewer shall be used, the manner of connecting therewith, and the plumbing and drainage in connection therewith and also shall agree to pay all fees required for securing the permit and a monthly fee in the amount set by the District for the privilege of using such sewer.

Section 816. Permit Optional. The granting of such permission for an outside sewer in any event shall be optional with the Board.

Section 817. Special Outside Agreements. Where special conditions exist relating to an outside sewer, they shall be the subject of a special contract between the applicant and the District.

Section 818. Excavation Permit. A separate permit must be secured from the County of any other person having jurisdiction thereover by Owners or Contractors intending to excavate for the purpose of installing sewers or making sewer connections.

Section 819. Liability. The District and its officers, agents and employees shall not be answerable for any liability or injury or death to any person or damage to any property arising during or growing out of the performance of any work by any such applicant. The applicant shall be answerable for, and shall hold the District and its officers, agents and employees harmless from any liability imposed by law upon the District or its officers, agents or employees, including all costs, expenses, fees and interest incurred in defending same or in seeking to enforce this provision. Applicant shall be solely liable for any defects in the performance of his work or any failure which may develop therein.

Section 820. Time Limit on Permits. Unless as extension of time is granted by the Board of Directors, if work under a permit is not commenced and completed within 180 days, the permit shall become void and no further work shall be done until a new permit shall have been secured.

ARTICLE IX

Enforcement

Section 901. Violation. Any person found to be violating any provision of this or any other ordinance, rule or regulation of the District, except Section 1001 hereof, shall be served by the Manager or other authorized person with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. Said time limit shall be not less than two (2) nor more than seven (7) working days. The offender shall, within the period of time stated in such notice, permanently cease all violations. All persons shall be held strictly responsible for any and all acts of agents or employees done under the provisions of this or any other ordinance, rule or regulation of the District. Upon being notified by the Manager of any defect arising in any sewer or of any violation of this Ordinance, the person or persons having charge of said work shall immediately correct the same.

Section 902. Public Nuisance. Continued habitation of any building or continued operation of any industrial facility in violation of the provisions of this or any other ordinance, rule or regulation of the District is hereby declared to be a public nuisance. The District may cause proceedings to be brought for the abatement of the occupancy of the building or industrial facility during the period of such violation.

Section 903. Disconnection. As an alternative method of enforcing the provisions of this or any other ordinance, rule or regulation of the District, the District shall have the power to disconnect the user or subdivision sewer system from the sewer mains of the District. Upon disconnection, the Manager shall estimate the cost of disconnection from and reconnection to the system and such user shall deposit the cost, as estimated, of disconnection and reconnection before such user is reconnected to the system. The Manager shall refund any part of the deposit remaining after payment of all costs of disconnection and reconnection.

Section 904. Public Nuisance, Abatement. During the period of such disconnection, habitation of such premises by human beings shall constitute a public nuisance, whereupon the District shall cause proceedings to be brought for the abatement for the occupancy of said premises by human beings during the period of such disconnection. In such event, and as a condition of reconnection, there is to be paid to the District a reasonable attorney's fee and cost of suit arising in said action.

Section 905. Means of Enforcement Only. The District hereby declares that the foregoing procedures are established as a means of enforcement of the terms and conditions of its ordinances, rules and regulations, and not as a penalty.

Section 906. Misdemeanor. Section 61621.5 of the Government Code of the State of California provides that the violation of an ordinance, rule or regulation of a district by any person is a misdemeanor. Each and every connection or occupancy in violation of the ordinances, rules and regulations of the District shall be deemed a separate violation and each and every day or part of a day a violation of the ordinance, rule or regulation continues shall be deemed a separate offense hereunder and shall be punishable as such.

Section 907. Civil Liability. Section 54740 of the Government Code of the State of California provides:

(a) Any person who intentionally or negligently violates any requirement adopted or ordered by the District pursuant to paragraph (a) or (b) of subdivision (1) of Section 54739 may be civilly liable in a sum of not to exceed Six Thousand Dollars (\$6,000) for each day in which such violation occurs.

(b) The District may petition the superior court to impose, assess and recover such sums. In determining such amount, the court shall take into consideration all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the nature and persistence of the violation, the length of time over which the violation occurs, and corrective action, if any.

Section 908. Liability for Violation. Any person violating any of the provisions of the ordinances, rules or regulations of the District shall become liable to the District for any expense, loss or damage occasioned by the District by reason of such violation.

ARTICLE X

Miscellaneous Provisions

Section 1001. Protection from Damage. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance or equipment which is a part of the District sewage works. Any person violating this provision shall be subject to the penalties provided by law.

Section 1002. Powers and Authorities of Inspectors. The officers, inspectors, managers and any duly authorized employees of the District shall carry evidence establishing his position as an authorized representative of the District and upon exhibiting the proper credentials and identification shall be permitted to enter in and upon any and all buildings, industrial facilities and properties for the purposes of inspection, re-inspection, observation, measurement, sampling, testing or otherwise performing such duties as may be necessary in the enforcement of the provisions of the Ordinance, rules and regulations of the District.

Section 1003. Separability. If any section, subsection, sentence, clause or phrase of this Ordinance or the application thereof to any person or circumstances is for any reason held to be unconstitutional or invalid, such decision shall not affect the validity of the remaining portions of this Ordinance or the application of such provision to other persons or circumstances. The Board hereby declares that it would have passed this Ordinance or any section, subsection, sentence, clause or phrase hereof irrespective to the fact that any one or more section, subsection, sentences, clauses or phrases be declared to be unconstitutional.

Section 1004. Repeal of Inconsistent Ordinances. All ordinances and parts of ordinances inconsistent herewith are hereby repealed.

President of the
Lake Shastina Community Services District

ATTEST:

Secretary of the
Lake Shastina Community Services District

(SEAL)

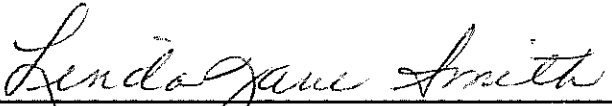

* * * * *

I hereby certify that the foregoing Ordinance was duly and regularly passed and adopted by the Board of Directors of the Lake Shastina Community Services District, Siskiyou County, at a meeting thereof held on the 1st day of February, 1980, by the following vote of the members thereof:

AYES, and in favor thereof, Directors: Applegate, Carter,
Erickson, Miralles and Storey..

NOES, Directors: None

ABSENT, Directors: None

Secretary
Lake Shastina Community Services District

(SEAL)

5. Personnel Policy - Applegate and Miralles

The Board members reviewed the proposed "Personnel Policy" making corrections and additions noted by the Secretary. Director Applegate made a motion and Director Erickson seconded the motion to adopt this corrected "Personnel Policy."

AYES, and therefore in favor of, Directors Applegate, Carter, Erickson, Miralles and Storey.

6. Preparation of "Preliminary Environmental Assessment" for Acceptance of Sewer System - Carter

President Carter requested Director Storey to complete the "Preliminary Environmental Assessment" which will accompany the "Rate Ordinance" when it is completed. Director Storey stated the "Assessment Report" was ready.

7. Two Ordinances Regulating Sewer System - Carter

President Carter referred to the Ordinance entitled: "An Ordinance Regulating the Use of Public and Private Sewers and Drains, the Installation and Connection of Building Sewers, the Installation of Sewer Laterals and Public Sewer Main Extensions, Providing for Employment of a Manager and District Inspector, Providing Permits and Fixing Fees for the Installation and Connection of Sanitary Sewers, Establishing Charges for Annexed Areas and Subdivisions, Regulating the Discharge of Waters and Wastes Into the Public Sewer System, and Providing Penalties for the Violation of the Provisions Thereof," a copy of which is on file in the District office.

Director Erickson moved the Board adopt this Ordinance and number it 1-80.

Director Applegate seconded the motion.

AYES, and therefore in favor of, Directors Applegate, Carter, Erickson, Miralles and Storey.

Secretary instructed to post Ordinance # 1-80 according to Counsel's advice.

President Carter referred to the Ordinance entitled: "An Ordinance Regulating the Discharge of Sewage and Industrial Wastes Into the Public Sewer System, Regulating the Use of Public Sewers, and Providing Penalties for the Violation of the Provisions Thereof," a copy of which is on file in the District office.

Director Erickson moved the Board adopt this Ordinance and number it 2-80.

Director Applegate seconded the motion.

AYES, and therefore in favor of, Directors Applegate, Carter, Erickson, Miralles and Storey.

Secretary instructed to post Ordinance # 2-80 according to Counsel's advice.

5. NEW BUSINESS:

1. Adoption of Resolution #1-80 Changing Meeting Day

Director Applegate made the motion to adopt "Resolution 1-80 Amending Resolution # 1-79 Changing the Meeting Day" from the first Friday to the first Tuesday of each month.

Director Erickson seconded.

AYES, and therefore in favor of, Directors Applegate, Carter, Erickson, Miralles and Storey.

Jan 4

CERTIFICATE OF POSTING

ORDINANCE NO. 1-80

LAKE SHASTINA COMMUNITY SERVICES DISTRICT

LINDA SMITH, under penalty of perjury, certifies as follows:

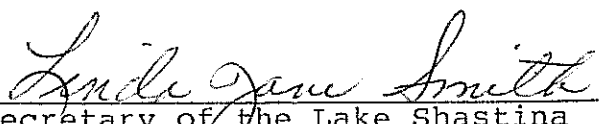

That she is, and during all times herein mentioned was, the duly appointed and qualified Secretary of the Lake Shastina Community Services District, Siskiyou County, California;

That on the 4th day of February, 1980, she caused to be posted full, true and correct copies of Ordinance No. 1-80, An Ordinance Regulating the Use of Public and Private Sewers and Drains, the Installation and Connection of Building Sewers, the Installation of Sewer Laterals and Public Sewer Main Extensions, Providing for Employment of a Manager and District Inspector, Providing Permits and Fixing Fees for the Installation and Connection of Sanitary Sewers, Establishing Charges for Annexed Areas and Subdivisions, Regulating the Discharge of Waters and Wastes Into the Public Sewer System, and Providing Penalties for the Violation of the Provisions Thereof, a copy of which is attached hereto and incorporated herein by reference, in three public places in the District, as follows:

1. Offices, lower-level, Whispering Winds Lodge
2. Bulletin Board at mailboxes, Lake Shore Drive
3. Juniper Inn, Country Club Restaurant

and that said Ordinance was posted within ten days after adoption thereof.

Executed on the 4th day of February, 1980.

Secretary of the Lake Shastina
Community Services District
